

Accessing the ELCA Directory

Follow these steps to access the Directory:

1. Navigate to <https://directory.elca.org/> with any web browser.
2. Select a login provider and enter your credentials.

Chances are, your preferred email address is already associated with one of our supported login identity providers: Facebook, Google, Microsoft or Yahoo. If you have an ELCA Login (ELCA Community) account, or an @elca.org email address, you can also use that.

If your primary email address isn't connected with any of the above identity providers, please create an ELCA Login by going to <http://community.elca.org> and selecting "New user registration." After creating your ELCA Login you can return to <https://directory.elca.org> or <https://My.ELCA.org> and log in.

If you have successfully accessed the Directory before but you are no longer able to select a new login provider, or if you are encountering errors or unusual search results within the Directory, it is possible that your web browser is loading a "cached" page that it has downloaded previously. For help clearing your web browser's cache, view the appropriate support link below.
